# Audit evidence

SCORECARD READY

HTTP response — ATTENTION

**HTTP 429** · The page was requested directly at this address and returned this response. Final URL after any redirects: https://redhawkroofinginc.com/service-areas/racine-wi

Indexing directives — OBSERVED

**None captured** · No indexing restriction was found. This does not confirm the page is actually indexed by Google, only that nothing is blocking it.

Canonical URL — ATTENTION

**Not captured** · A canonical tag tells search engines which URL is the authoritative version of a page. Google treats it as a strong hint, not a guarantee, and can still choose a different URL.

Search metadata — ATTENTION

**Title present · no description** · This confirms a title and description exist in the code. Google often rewrites these when generating the actual search result snippet.

Contact routes — ATTENTION

**0 phone links · 0 email links · 0 forms** · No clickable phone link, email link, or contact form was found on this page. A visitor arriving here has no direct way to reach this business.

Mobile performance — NOT MEASURED

**Not measured** · Google PageSpeed is not connected for this report, so mobile performance is intentionally left unmeasured rather than estimated.

SOURCE SCORECARD

# Separate signals. Peer benchmark pending.

Website structure

NOT MEASURED

The page did not return a successful public HTML response.

## SEO health

NOT MEASURED

The page did not return a successful public HTML response.

## Local relevance

NOT MEASURED

The page did not return a successful public HTML response.

## Conversion evidence

NOT MEASURED

The page did not return a successful public HTML response.

## Trust evidence

NOT MEASURED

The page did not return a successful public HTML response.

## Technical foundations

NOT MEASURED

The page did not return a successful public HTML response.

**Overall score: not measured · commercial valuation: not measured**

No percentile is issued until a comparable peer cohort is loaded. Business valuation cannot be inferred from an unsuccessful page response.

- Comparable peer URLs
- Verified Search Console or analytics data
- Revenue, lead, or valuation inputs

WHAT THE BUSINESS OWNER SEES NEXT

# Evidence first. Clear actions second.

01 Fix the HTTP 429 response first — a page returning an error cannot be indexed or found by potential customers searching online.

02 Add a clickable phone number, email link, or contact form to this page. None was found in the captured HTML, which means a visitor arriving here has no direct way to reach the business.

03 Add one clear, primary heading describing the page’s main service or topic — this helps both visitors and search engines quickly understand what the page offers.

04 Add a page title and meta description where missing, then check how Google actually displays this page in search results, since it may rewrite these.
