Audit evidence

SCORECARD READY

HTTP response — VERIFIED

HTTP 200 · The page was requested directly at this address and returned this response. Final URL after any redirects: https://mannyscentraliowaexteriors.com/roofing

Indexing directives — OBSERVED

index, follow · This directive was found in the page's meta tags or response headers, and tells search engines whether they may index this page.

Canonical URL — OBSERVED

https://mannyscentraliowaexteriors.com/ · A canonical tag tells search engines which URL is the authoritative version of a page. Google treats it as a strong hint, not a guarantee, and can still choose a different URL.

Search metadata — OBSERVED

Title present · description present · This confirms a title and description exist in the code. Google often rewrites these when generating the actual search result snippet.

Contact routes — ATTENTION

0 phone links · 0 email links · 0 forms · No clickable phone link, email link, or contact form was found on this page. A visitor arriving here has no direct way to reach this business.

Mobile performance — NOT MEASURED

Not measured · Google PageSpeed is not connected for this report, so mobile performance is intentionally left unmeasured rather than estimated.

SOURCE SCORECARD

Separate signals. Peer benchmark pending.

Website structure — 15

CRITICAL

On this page, the page has no H1 heading, which weakens its structure for both visitors and search engines; no H2 or H3 subheadings were found, so the content has little visual hierarchy, and no

semantic HTML5 layout elements (such as <main> or <nav>) were found in the markup. The page has almost no visible text, a mobile viewport tag is present, and 0 of 1 images (0%) have alt text.

Capped at 70 because we can only review the raw HTML. We cannot see how the page actually looks or behaves for a real visitor, or confirm mobile usability firsthand.

SEO health

70

DEVELOPING

On this page, the page title is 60 characters, within the ideal 30-60 character range, and the meta description is 151 characters, within the ideal 100-165 character range. A canonical tag is present, an indexing directive ("index, follow") was found and does not block indexing, and a sitemap file is reachable.

Capped at 70 because on-page HTML cannot show actual search rankings, impressions, clicks, or how much qualified traffic the page receives.

Local relevance

0

CRITICAL

No location-related or service-related wording was found in the page text.

Capped at 55 because wording alone is not proof of a real, verified service area. That requires confirmation from a verified Google Business Profile or similar source.

Conversion evidence

0

CRITICAL

The page has 0 clickable phone links, 0 clickable email links, 0 contact forms, and 0 call-to-action phrases (such as "call now" or "get a quote"), captured directly from the HTML.

Capped at 65 because HTML alone cannot confirm whether these contact options are visible without scrolling, whether the form actually submits, whether calls are answered, or whether leads convert into paying customers.

Trust evidence

0

CRITICAL

Trust-related wording found on the page: none. Structured data types detected in the code: none. These are mentions and markup only — the underlying claims are not independently verified.

Capped at 69 because public HTML cannot verify claims like licensing, insurance, awards, or customer outcomes — those need a third-party or verified source.

Technical foundations

70

DEVELOPING

On this page, the page loads over HTTPS; a mobile viewport tag is present; a page language is declared ("en"); a canonical link is present; robots.txt is reachable; and a sitemap file is reachable.

Capped at 70 because this does not include page speed, uptime history, crawl-budget usage, or real-user performance data — those need ongoing monitoring, not a one-time HTML capture.

Overall score: not measured · commercial valuation: not measured

Once enough comparable businesses are audited, scores here will be percentile-ranked against other companies in the same trade and market — not against every website on the internet. An accurate valuation requires financial records or verified commercial data. Website HTML alone cannot support a valuation estimate.

- Websites from comparable competitors
- Verified Search Console, analytics, or CRM data
- Revenue, lead volume, or valuation figures

WHAT THE BUSINESS OWNER SEES NEXT

Evidence first. Clear actions second.

01 Add a clickable phone number, email link, or contact form to this page. None was found in the captured HTML, which means a visitor arriving here has no direct way to reach the business.

02 Add one clear, primary heading describing the page's main service or topic — this helps both visitors and search engines quickly understand what the page offers.

03 Run this page through Google PageSpeed to measure real mobile performance before making any speed claims; this audit intentionally does not estimate it.

04 Connect a verified Google Search Console property to see real clicks, impressions, click-through rate, and average search position for this page.
