# Audit evidence

SCORECARD READY

## HTTP response

ATTENTION

**HTTP 404** · The page was requested directly at this address and returned this response. Final URL after any redirects: <https://www.coolseasonsac.com/ac-installation>

## Indexing directives

OBSERVED

**None captured** · No indexing restriction was found. This does not confirm the page is actually indexed by Google, only that nothing is blocking it.

## Canonical URL

ATTENTION

**Not captured** · A canonical tag tells search engines which URL is the authoritative version of a page. Google treats it as a strong hint, not a guarantee, and can still choose a different URL.

## Search metadata

ATTENTION

**Title present · no description** · This confirms a title and description exist in the code. Google often rewrites these when generating the actual search result snippet.

## Contact routes

ATTENTION

**0 phone links · 0 email links · 0 forms** · No clickable phone link, email link, or contact form was found on this page. A visitor arriving here has no direct way to reach this business.

## Mobile performance

NOT MEASURED

**Not measured** · Google PageSpeed is not connected for this report, so mobile performance is intentionally left unmeasured rather than estimated.

## SOURCE SCORECARD

# Separate signals. Peer benchmark pending.

## Website structure

NOT MEASURED

The page did not return a successful public HTML response.

## SEO health

**NOT MEASURED**

The page did not return a successful public HTML response.

## Local relevance

**NOT MEASURED**

The page did not return a successful public HTML response.

## Conversion evidence

**NOT MEASURED**

The page did not return a successful public HTML response.

## Trust evidence

**NOT MEASURED**

The page did not return a successful public HTML response.

## Technical foundations

**NOT MEASURED**

The page did not return a successful public HTML response.

**Overall score: not measured · commercial valuation: not measured**

No percentile is issued until a comparable peer cohort is loaded. Business valuation cannot be inferred from an unsuccessful page response.

#### WHAT THE BUSINESS OWNER SEES NEXT

## Evidence first. Clear actions second.

- 01** Fix the HTTP 404 response first — a page returning an error cannot be indexed or found by potential customers searching online.
- 02** Add a clickable phone number, email link, or contact form to this page. None was found in the captured HTML, which means a visitor arriving here has no direct way to reach the business.
- 03** Add one clear, primary heading describing the page's main service or topic — this helps both visitors and search engines quickly understand what the page offers.
- 04** Add a mobile viewport tag and test the page on an actual phone-sized screen — most visitors to a local service business site are on mobile.
