Audit evidence

SCORECARD READY

HTTP response

VERIFIED

HTTP 200 · The page was requested directly at this address and returned this response. Final URL after any redirects: <https://edmondair.com/>

Indexing directives

OBSERVED

index, follow, max-image-preview:large, max-snippet:-1, max-video-preview:-1 · This directive was found in the page's meta tags or response headers, and tells search engines whether they may index this page.

Canonical URL

OBSERVED

https://edmondair.com/ · A canonical tag tells search engines which URL is the authoritative version of a page. Google treats it as a strong hint, not a guarantee, and can still choose a different URL.

Search metadata

ATTENTION

Title present · no description · This confirms a title and description exist in the code. Google often rewrites these when generating the actual search result snippet.

Contact routes

ATTENTION

0 phone links · 0 email links · 0 forms · No clickable phone link, email link, or contact form was found on this page. A visitor arriving here has no direct way to reach this business.

Mobile performance

NOT MEASURED

Not measured · Google PageSpeed is not connected for this report, so mobile performance is intentionally left unmeasured rather than estimated.

SOURCE SCORECARD

Separate signals. Peer benchmark pending.

Website structure

70

DEVELOPING

On this page, the page has 2 H1 headings, when best practice is exactly one; 5 H2 and 2 H3 subheadings break up the content, and 10 semantic layout elements (such as <main>, <nav>, or

<section>) were found in the markup. The page has a substantial amount of visible text, a mobile viewport tag is present, and 11 of 14 images (79%) have alt text.

Capped at 70 because we can only review the raw HTML. We cannot see how the page actually looks or behaves for a real visitor, or confirm mobile usability firsthand.

SEO health

59

WEAK

On this page, the page title is 22 characters, outside the ideal 30-60 character range, and no meta description was found. A canonical tag is present, an indexing directive ("index, follow, max-image-preview:large, max-snippet:-1, max-video-preview:-1") was found and does not block indexing, and a sitemap file is reachable.

Capped at 70 because on-page HTML cannot show actual search rankings, impressions, clicks, or how much qualified traffic the page receives.

Local relevance

55

WEAK

The page text contains 4 location-related terms and 16 service-related terms. This reflects wording only; it does not confirm a verified service area or business location.

Capped at 55 because wording alone is not proof of a real, verified service area. That requires confirmation from a verified Google Business Profile or similar source.

Conversion evidence

24

CRITICAL

The page has 0 clickable phone links, 0 clickable email links, 0 contact forms, and 3 call-to-action phrases (such as "call now" or "get a quote"), captured directly from the HTML.

Capped at 65 because HTML alone cannot confirm whether these contact options are visible without scrolling, whether the form actually submits, whether calls are answered, or whether leads convert into paying customers.

Trust evidence

58

WEAK

Trust-related wording found on the page: licensed, insured, warranty, reviews, experience. Structured data types detected in the code: WebPage, ReadAction, BreadcrumbList, ListItem, WebSite, SearchAction, EntryPoint, PropertyValueSpecification. These are mentions and markup only — the underlying claims are not independently verified.

Capped at 69 because public HTML cannot verify claims like licensing, insurance, awards, or customer outcomes — those need a third-party or verified source.

Technical foundations

70

DEVELOPING

On this page, the page loads over HTTPS; a mobile viewport tag is present; a page language is declared ("en-US"); a canonical link is present; robots.txt is reachable; and a sitemap file is reachable.

Capped at 70 because this does not include page speed, uptime history, crawl-budget usage, or real-user performance data — those need ongoing monitoring, not a one-time HTML capture.

Overall score: not measured · commercial valuation: not measured

Once enough comparable businesses are audited, scores here will be percentile-ranked against other companies in the same trade and market — not against every website on the internet. An accurate valuation requires financial records or verified commercial data. Website HTML alone cannot support a valuation estimate.

WHAT THE BUSINESS OWNER SEES NEXT

Evidence first. Clear actions second.

- 01 Add a clickable phone number, email link, or contact form to this page. None was found in the captured HTML, which means a visitor arriving here has no direct way to reach the business.
- 02 Add a page title and meta description where missing, then check how Google actually displays this page in search results, since it may rewrite these.
- 03 Run this page through Google PageSpeed to measure real mobile performance before making any speed claims; this audit intentionally does not estimate it.
- 04 Connect a verified Google Search Console property to see real clicks, impressions, click-through rate, and average search position for this page.
